

## WATERAID'S VISION

Our vision is a world where everyone, everywhere has access to safe water and sanitation. You can help us turn this vision into a reality. We work with the poorest and most marginalized communities in sub-Saharan Africa, Asian, Central America, and the Pacific Region. Through local partners we set up practical and sustainable water, sanitation, and hygiene projects that are designed to meet the specific needs of each community.

### About WaterAid

Since 1981 WaterAid's community-led projects around the world have reached 21.1 million people with safe water and 18 million people with sanitation. Globally, more than 2 billion people have gained access to clean water since 1990's. If we keep this momentum, we can end the water and sanitation crisis in our lifetime. Water and sanitation pack a big punch in the fight against global poverty.

### The Easton's Group is supporting WaterAid!

For the second year in a row the Easton's Group is teaming up with WaterAid Canada to help provide clean water and safe sanitation to those in need! This year the Easton's group is raising funds to support work in the northern coastal regions of Nicaragua. With the support of the Easton's Group, and travellers like you, we've providing safe drinking water and safe sanitation facilities to thousands of people.

Known as the "Land of lakes and volcanoes", Nicaragua has abundant sources of freshwater, but **little of it is safe to drink or readily accessible**. 900 thousand people live without safe drinking water.

### About Nicaragua

Even though the central American country of Nicaragua has made huge strides in development in the last decade, there are still many challenges that face this nation. Currently 3 million Nicaraguans don't have a safe place to relieve themselves, and over 900 000 don't have access to simple, safe drinking water. As a result women and children, especially girls spend hours every day fetching dirty water, time they could be spending in school, or farming. In Nicaragua this year, 300 children will die from diarrhea alone. We're working to change this, and you can help! We're working in the Northern Atlantic Autonomous Region, and so far we've reached 6800 people with clean drinking water, and over 4000 people with safe sanitation. This year, we're ready to upscale this project to reach thousands more people!

## Take Action

Help the Easton's Group help others! A small donation can go a long way! If just five people each donate five dollars, that could provide one person with access to clean water. Talk to your front desk agent about how you can make a difference in Nicaragua, or go to [wateraidcanada.com](http://wateraidcanada.com) to find out more.

# \$25

Gives one person clean water.

## Everyone, Everywhere

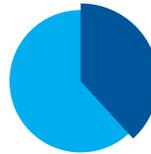

We want everyone, everywhere to have clean water, toilets and hygiene by 2030. We know these basic services unlock better health, education and livelihoods, and are central to eradicating extreme poverty.

WaterAid

**748<sup>M</sup>**

people in the world don't have access to safe water. This is roughly one in ten of the world's population.

2.5 billion people don't have access to an adequate bathroom, one in three of the world's population.

**500K**

More than 500,000 children die every year from diarrhea caused by unsafe water and poor sanitation. That's over 1,400 children a day.
